Virginia Uniform Crime Reporting Program

DEPARTMENT OF STATE POLICE

Foreword

Crime is of great concern to all citizens of Virginia. By use of crime statistics, criminal justice agencies can make an informed decision concerning the most efficient and effective manner in which to dedicate their limited resources toward the reduction of crime in their communities. The Uniform Crime Reporting (UCR) Program is a system of collecting and analyzing crime statistics gathered on selected crimes by participating law enforcement agencies throughout the Commonwealth. We acknowledge the efforts made by these agencies in making this report accurate and concise.

All information in this report uses an incident based reporting format. The Incident Based Reporting (IBR) central repository went into production in January 1994. At that time all contributing agencies were given five years to convert their summary system into an incident based system. All agencies have now completed this process and we are no longer accepting summary hard copy reports. In the section, "Group A Offenses By Contributing Agencies," if the agency did not submit an entire year of data, the footnote beside the agency's name represents the number of months of submission. The statewide population for this publication (8,382,993) is a 2015 provisional estimate provided by the Weldon Cooper Center For Public Service, University of Virginia.

In accordance with the *Code of Virginia*, the Department of State Police, as the central repository, collects crime information from participating agencies. The most accurate information available in Virginia is used to generate the statistics contained in this annual report. IBR statistics were originally for police agencies only, but community concern has generated a use by both public and private sources. This use increases yearly. The IBR information has become the primary vehicle used to evaluate levels of criminal activity in jurisdictions throughout Virginia.

The participation and cooperation of all agencies making this publication possible is sincerely appreciated. The quality of the program continues to be maintained through their cooperative efforts.

-  The theft of money accounted for a property loss of \$64,061,900. (Page 60)
-  Firearms represented 24.7% of all known weapons used in aggravated assaults. Of all victims of aggravated assault, 64.3% had some type of injury. (Page 47)
-  There was a total value loss of \$75,278,993 related to 7,955 completed motor vehicle offenses. (Page 61)
-  There were 126,032 Group A arrests reported by the contributing agencies and 156,390 Group B arrests reported. (Pages 74 & 75)
-  There were 1,238 assaults on officers reported in Virginia. Just under one-quarter (24.2%) involved some type of injury to the officer. (Page 56)
-  Of the 155 hate crime offenses reported, 45.8% of these were assault offenses and 31.6% were vandalism/damage of property offenses. (Page 52)

Clearance Rates:

This report no longer contains clearance rates. The IBR system does not accurately reflect the volume of clearances each department produces in a given year. Additionally, the number of arrests in a jurisdiction does not provide precise offense clearance information in that one person arrested could clear multiple offenses.

Virginia Uniform Crime Reporting Program

HISTORY

Development of the nationwide summary Uniform Crime Reporting (UCR) Program began eighty years ago. In 1930, crime counts were first requested from local police departments, with the Federal Bureau of Investigation designated by Congress to collect, compile, and analyze these figures. The Committee on Uniform Crime Records of the International Association of Chiefs of Police played a primary role in the origin and development of the UCR Program and serves in a strong advisory capacity. In 1966, the National Sheriffs' Association (NSA) established a Committee on Uniform Crime Reporting to serve in an advisory capacity to the NSA membership and the National Uniform Crime Reporting Program. Today, this committee and similar committees within the state law enforcement associations are active in promoting interest in the UCR Program. Standardized offense classifications and scoring procedures to ensure uniformity and consistency of data were major components in all of these reports. All of the Uniform Crime Reports were designed to be a by-product of information that a law enforcement agency should routinely compile for its own efficient administration and performance. The underlying philosophy and focus is and always has been oriented toward the creation of police statistics for use by law enforcement agencies. The unique nature of the program, however, also makes the data invaluable for use by elected officials and the public.

The FBI has actively assisted individual states in the development of statewide programs of police statistics compatible with the national system. These state statistical programs provide the advantage of increased coverage of reporting by law enforcement agencies. State systems also provide direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them. Through coordination by the state collection agency, the data is available for use by the state while substantially streamlining the collection and reporting machinery for the national program.

Prior to June 30, 1974, no mandatory uniform crime reporting law existed in Virginia, and of the 288 agencies in the Commonwealth, 162 or 56% were voluntarily reporting directly to the Federal Bureau of Investigation. Effective law enforcement requires the cooperation and coordination of all law enforcement agencies within and among political subdivisions. Such efforts become possible only through the collection and statistical analyses of complete and accurate information.

The need for complete and accurate information on the number of offenses and offenders was long recognized in the state. The system developed in Virginia produced vital information that assisted law enforcement agencies throughout the state by furnishing information for management decisions and planning programs. Virginia has now converted to a more extensive data collection system. This new system is discussed on the following page.

A statewide UCR program informs the Governor, Legislature, local and state law enforcement agencies, other governmental officials, and the public as to the nature, magnitude and trends of crime in Virginia. Through the collection of timely and reliable statistical information, local and state officials are better able to assess the direction and impact of crime.

UCR SYSTEM OBJECTIVES

The fundamental objectives of the Virginia Uniform Crime Reporting Program are:

- (1) To inform the Governor, Legislature, and other governmental officials, and the public as to the nature of the crime problem in Virginia—its magnitude and its trend.
- (2) To provide law enforcement administrators with criminal statistics for administrative and operational use.
- (3) To determine who commits crimes by age, sex, race, and other attributes in order to find the proper focus for crime prevention and enforcement.
- (4) To provide base data and statistics to measure the workload and effectiveness of Virginia's criminal justice system.
- (5) To provide base data and statistics to measure the effects of prevention and deterrence programs.
- (6) To provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
- (7) To provide base data to assist in the assessment of social and other causes for the development of theories of criminal behavior.

Incident Based Reporting

THE INCIDENT BASED REPORTING SYSTEM

Virginia has been publishing crime data in an expanded format since 1994. This reporting system, fully implemented in 2000, is known as Incident Based Reporting (IBR). The following information is furnished to provide an overall description of IBR.

During the preliminary development of IBR by the Federal Bureau of Investigation, advice was solicited from the National Association of State UCR programs, the International Association of Chiefs of Police, the National Sheriffs' Association, the National Alliance of State Drug Enforcement Agencies and other federal, state and local criminal justice agencies.

The guidelines and specifications developed were provided to South Carolina for testing through a pilot program in 1987. As a result of this testing, further refinements were made. In 1988, a national conference was held to present these guidelines and obtain feedback from representatives of law enforcement agencies in attendance. Recommendations included efforts to implement this system nationally, that the Federal Bureau of Investigation would manage this program and that an Advisory Policy Board be formed to assist in the development and implementation of the new program.

Virginia formed a State UCR Committee in 1986 to follow the developments of IBR and to evaluate its impact. This committee was composed of representatives from the Virginia State Sheriffs' Association, the Virginia Association of Chiefs of Police, the Department of Criminal Justice Services, and the Department of State Police. The State UCR Committee created the UCR Forms Subcommittee, which included representatives from police and sheriffs' agencies, the State Police, and the Department of Criminal Justice Services. This subcommittee developed, tested and subsequently recommended a standard Incident Based Reporting form for use in Virginia. The Forms Subcommittee recommended this form be used at the option of the reporting agencies. Agencies, however, may use their own form to report the required data to the central repository. It is important, at this point, to recognize that the purpose of these forms was to *collect* the various information concerning criminal activity. Because of the numerous data elements collected, law enforcement agencies *report* this data to the central repository via an automated system.

The UCR Committee recommended that the Superintendent of the Department of State Police adopt the minimum, mandatory data standards recommended by the FBI and proceed with implementation of Incident Based Reporting in Virginia. In addition, the committee recommended that the data be collected which would relate the property to the offense, the type of property security/alarm system used, and the means by which the offender left the scene of the offense. Additional data is also collected on Law Enforcement Officers Killed and Assaulted (LEOKA), providing description of activities and assignments the officer was performing at the time of the offense, as well as offenses that were also classified as Hate Crimes (i.e. bias motivated).

Some of the major benefits derived from the IBR system include: greater specificity in reporting; more correlation between offenses, property, victims, offenders, and arrestees; expanded victim/offender relationships; distinction between attempted and completed crimes and increased reporting of various circumstances relative to specific crimes.

The IBR system requires that extensive data be reported for *each crime* occurring during a particular incident. Under the old summary system, only limited data concerning the *most serious crime* occurring during a particular incident was reported.

Information relating to two different levels of offenses is collected by the IBR system. The most serious offenses are designated as Group "A"; the less serious offenses are designated as Group "B". Group "A" offenses consist of 22 categories of crimes involving 46 different offenses; a maximum of 10 offenses per incident may be reported. Agencies are required to report 75 data elements for Group "A" offenses. Group "B" offenses, consisting of 12 crimes, only require reporting arrest data. Group "A" offense categories along with their definitions are provided on page six.

While these figures are the most accurate available, it must be remembered that they represent a "snapshot" of incidents reported by local law enforcement agencies as well as follow UCR definitions. As such, it is possible that the number and categorization of offenses may differ when comparing these data with those from individual

Crime Factors

Direct comparisons or rankings of individual cities and counties based solely on the data presented in this publication should be done with caution. There are many factors that influence or contribute to crime. Crime in Virginia, however, restricts itself to population size alone to establish a crime rate. In addition to population size, some other factors believed to affect the type and volume of crime include:

1. Population density and degree of urbanization;
2. Population variations in composition and stability;
3. Economic conditions and employment availability;
4. Mores, cultural conditions, education, and religious characteristics;
5. Family cohesiveness;
6. Climate, including seasonal weather conditions;
7. Effective strength of the police force;
8. Standards governing appointments to the police force;
9. Attitudes and policies of the courts, prosecutors and corrections;
10. Citizen attitudes toward crime and police;
11. The administrative and investigative efficiency of police agencies and the organization and cooperation of adjoining and overlapping police jurisdictions;
12. Crime reporting practices of citizens.

Group A Offenses

Definitions of Categories of Group A Offenses

For practical purposes of measuring the trend and distribution of crime on the national and state level, the definitions for crime in the Incident Based Reporting (IBR) Program are generic in order not to exclude varying state and federal statutes relating to the same type of crime. The definitions which were developed for IBR are not meant to be used for charging persons with crimes. Essential to the maintaining of uniform and consistent data is the establishment of standard definitions which are used for the State and National Programs.

The IBR Group A Offense Categories and their definitions are:

Arson - Definition on Page 40.

Assault - Definition on Page 22.

Purse Snatching

The grabbing or snatching of a purse, handbag, etc., from the physical possession of another person

Shoplifting

Theft From Building

Theft From Motor Vehicle

The theft of articles from a motor vehicle, whether locked or unlocked

Theft of Motor Vehicle Parts or Accessories

The theft of any part or accessory affixed to the interior or exterior of a motor vehicle in a manner which would make the item an attachment of the vehicle, or necessary for its operation

All Other Larceny

All thefts which do not fit any of the definitions of the specific subcategories of Larceny/Theft listed above

Included are thefts from fenced enclosures. Theft of animals, bicycles, lawn mowers, lawn furniture, hand tools, and farm and construction equipment are also included where no breaking or entering of a structure is involved.

Larceny

Local offense classifications such as grand theft, petty larceny, or felony larceny have no bearing on the fact that each distinct operation of larceny is reported as one offense.

Motor vehicle theft is not included in the larceny totals and is counted separately because of the great volume of such thefts.

There were 128,930 larceny/attempted larceny offenses reported by the contributing agencies during 2015. July had the greatest occurrence of offenses reported.

Larceny

The nature of larceny, a crime of opportunity, sneak thievery and petty unobserved thefts, makes it an extremely difficult offense for law enforcement officers to solve. A lack of witnesses and the volume of these crimes work in the offender's favor.

Hate Crime

Hate crimes are not separate, distinct offenses, but rather reported crimes motivated by the offender's bias. Because of the difficulty of ascertaining the offender's subjective motivation, bias is reported only if investigation reveals sufficient information to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias against race, religion, disability, ethnicity or sexual-orientation. In 2015 there were 155 hate crimes reported.

VI Arrest Data

Arrest Data 2015

Arrest statistics reflecting characteristics such as age, gender and race are collected monthly from contributing law enforcement agencies. It should be remembered that arrest figures cannot directly be compared to offense figures. Several persons, for example, could be arrested for the same offense or the arrest of one person could solve several offenses. Arrests are primarily a measure of police activity as it relates to crime. Although law enforcement arrest policies vary, particularly with respect to juveniles, agencies are instructed to count one arrest each time an individual is taken into custody for committing one or more offenses. A juvenile arrest is counted when an offense is committed and the circumstances are such that if the juvenile had been an adult, an arrest would have been made.

Agencies Failing to Submit Any Data Files

Delinquent Agencies 2015

Agencies had been formally notified that if we did not receive at least one monthly file during 2015, they would be designated as delinquent regarding Incident Based Reporting.

This action was felt to be necessary to encourage all reporting agencies to comply with Section 52-28, Code of Virginia. Without the cooperation from each contributing agency, the ability to ensure complete and accurate data cannot be realized, resulting in an incorrect portrayal of crime and its associated factors.

While most agencies complied, the list below represents those that did not.

Agency

Bloxom Police Department

Glasgow Police Department

La Crosse Police Department

Remington Police Department

University of Mary Washington Police Department
